User Friendly, Automatic Social Media Archiving

facebook   twitter   Instagram   tumblr

Pinterest   flickr   Linked in   vimeo

Nextdoor   everbridge NIXLE   YouTube

Search, organize & supervise all social media activity for compliance

Finally, User Friendly Automatic Social Media Archiving

No more screen shots or chasing employees for messages.

Search, Organize, Supervise & Produce polished PDFs for regulators.

One Place to Search   **One Place to Organize**   **One place to Supervise**

Intradyn's Social Media Archiver captures all of your social media content in evidentiary quality, retaining the content and keeping it suitable for compliance and litigation preparedness purposes.

Most social media platforms do not have the feature set to capture and preserve the content for retention and compliance purposes. An original message can be lost forever if it is deleted, text edited or image altered in any form.

Intradyn helps make compliance easy!

- Automatically capturing Social Media Posts, Edits & Deletions
- Storing all messages centrally (even if a user deletes the original message)
- Giving your Compliance Team an easy search interface (as easy as a Google Search!)

- Powerful organization tools to group messages for specific review.
- Repurpose the same lexicon you have for Email across your social media activity.
- Easy Export feature so you can quickly package for production and track history.

How Does It Work?

Intradyn captures social media content in near real time via APIs and securely stores it in a centralized archive. All posts, edits even deletions — including metadata — are saved, categorized, and indexed for fast retrieval.

View All Social Media Metadata & Content

Review social media messages the same as you would an email and add tags, apply legal holds, and redact content to support eDiscovery efforts using our one-click detail drill-down capability.

Search, Retrieve, Supervise & Produce

Intradyn enables you to produce Social Media communications in your choice of native or standard non-native format, making it easy to comply with industry regulations.
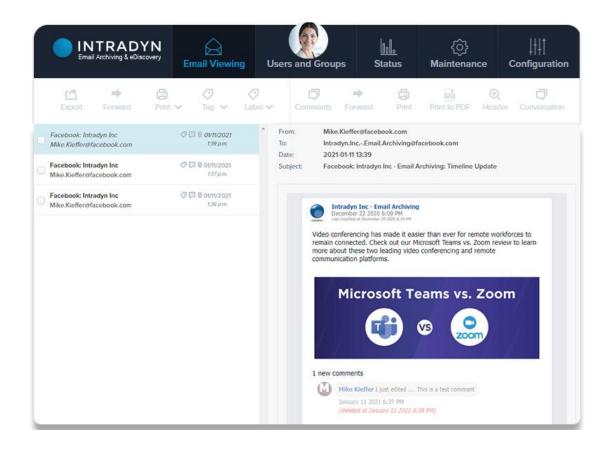

Flexible Archiving Options

Intradyn's flexible archiving options enable us to support any archive. While we are Archive Agnostic, our Intradyn archive does offer tools to make records production even easier.

Support for all Major Social Media Platforms

Facebook, X | Twitter, Instagram, Tumblr, Pinterest, Flickr, Linkedin, Vimeo, Nextdoor, Nixle, Youtube.
